## WE ❤️ OUR CLIENTS!

One of the most neglected items we see on any vehicle is the **cabin air filter**. This filter is just like the one in your home – **it cleans the air & helps trap allergens, bacteria, dust, bugs and other debris**. A dirty or clogged cabin air filter can cause you to breathe in dangerous fumes & particles, not to mention it will impair air flow which can cause interior heating & cooling problems. We recommend replacing every 12,000 - 15,000 miles.

See You Soon! - Mark
