"We Think You Are
AWESOME!"

THANKS FOR THE KIND WORDS!

"I was a first-time customer that they offered to get into the shop ASAP. I had initially scheduled a review of my brakes with them, but was able to get into a national chain place first. Big mistake by not waiting. Kept the Yeck's appointment on the books and turned out they were able to fix the faulty install work by the Brake's place. Yeck's were professional and great to work with. Top notch and I will certainly use them going forward." -Kaleb H., Bellevue, NE

MANAGER'S MINUTE

Chances are, your car is the second largest investment next to your home. October is Fall Car Care Month & the message is simple... "Take care of your car, your car will take care of you." Be proactive, not reactive. Care for it on a regularly scheduled basis & it will deliver the greatest return on investment by performing safely & dependably for you & your family – especially when you really need it to.

On another note, the numbers are in from our 12th annual "Golf for Vets" tournament. We were able to raise \$26,000 to split between the DAV Chapter 47 and the Eastern Nebraska Veterans Home. Both entities were extremely gracious and appreciative for the donations. I know they will be put to good use in supporting our Veterans. Thank you to all who participated, and stand by for exciting news about next year's event!

See You Soon!

OCTOBER IS NATIONAL FALL CAR CARE MONTH!

The last thing any driver needs is a vehicle that breaks down in inclement weather. Here's a helpful checklist to inspect your vehicles before the temperatures drop and severe weather hits.

HEATING, WIPERS & LIGHTS

- Make sure heaters, defrosters and wipers work properly.
- Consider winter wiper blades and use cold-weather washer fluid. As a general rule, wiper blades should be replaced every six months.
- Check to see that all exterior and interior lights work and headlights are properly aimed.

TIRES & BRAKES

- Check the tire tread depth and tire pressure of all tires, including the spare. If snow and ice are a problem in your area, consider special tires designed to grip slick roads.
- During winter, tire pressure should be checked weekly.
- Have the brakes checked. The braking system is the vehicle's most important safety item.

GAS, OIL & FILTERS

- Keep your gas tank at least half full throughout the cold weather to prevent moisture from forming in gas lines and possibly freezing.
- Be diligent about changing the oil and filter at recommended intervals. Dirty oil can spell trouble in winter. Consider changing to "winter weight" oil if you live in a cold climate.
- Check the fuel, air and transmission filters at the same time.

SYSTEM CHECKS – CHARGING, COOLING & EXHAUST

- Have the battery and charging system checked, as cold weather is hard on batteries.
- Clean, flush and put new antifreeze in the cooling system. As a rule of thumb, this should be done every two years.
- Have the exhaust system checked for carbon monoxide leaks, which can be especially dangerous during cold-weather driving when windows are closed.

PACK THE ESSENTIALS

- Make sure that your ice scraper and snow brush are accessible and ready to use if you live in a cold climate.
- Stock an emergency kit with jumper cables, a flashlight, blankets, extra clothes, bottled water, nonperishable food and a first aid kit with any needed medication.

Whether you perform the inspection and maintenance yourself or go to a trusted repair shop, it's a small investment of time and money to help avoid the cost and hassle of a breakdown during the cold winter months ahead.
